Security Pipeline Report

Repository: owner/repo
Branch: main
Commit: deadbeef
Generated: 11/25/2025, 4:38:54 AM

⬤ Executive Summary

1	**0**	**0**
Dependencies	**Code Issues**	**Secrets**
Vulnerabilities	Semgrep	Leaked

Security Pipeline Report

● Dependency Vulnerabilities

Total Dependencies: 10
Vulnerable Dependencies: 1

Severity Breakdown:
HIGH: 1

Top Vulnerabilities:

Package	Severity	CVE	CVSS Score
package-a	HIGH	CVE-2025-0001	7.8

Security Pipeline Report

● Code Security Analysis (Semgrep)

' **No security issues detected by Semgrep**

Security Pipeline Report

⬤ Threat Model Analysis

Total Threats: 0

' No significant threats identified

Security Pipeline Report

● Secret Detection (Gitleaks)

' No secrets or credentials detected

Security Pipeline Report

● Recommendations

1. Update Vulnerable Dependencies
1 vulnerable dependencies detected. Run 'npm audit fix' or update packages manually to patch known vulnerabilities.

2. Implement CI/CD Security Checks
Integrate these security scans into your CI/CD pipeline to catch vulnerabilities before they reach production.

3. Regular Security Audits
Schedule regular security scans and code reviews. Keep dependencies updated and monitor security advisories.
